harshitsingh097@gmail.com | [linkedin.com/in/harshitsingh097](https://www.linkedin.com/in/harshitsingh097)

PROFESSIONAL SUMMARY

Skilled Python Developer with 4+ years of experience in backend development, automation, and ML model deployment. Proficient in Python, CI/CD, and Docker. Seeking roles as Python Developer, ML Engineer, Automation Engineer, or Backend Developer to deliver scalable, AI-driven solutions with clean system design.

EDUCATION

Master of Computer Applications, GLA University, Mathura 2017 – 2019
GPA: 8.7 / 10

Bachelor of Computer Applications, Subharti University, Meerut 2014 – 2017
GPA: 6.9 / 10

TECHNICAL SKILLS

Languages	Python, Bash, SQL, JavaScript
Databases	PostgreSQL, SQLite, Redis
Frameworks	Django, FastAPI, scikit-learn, TensorFlow, PyTorch
Tools	Git, Docker, Postman, MLflow, Jupyter, VS Code
Core Concepts	Machine Learning, Deep Learning, Data Engineering, REST APIs, System Design

WORK EXPERIENCE

Python Developer / System Engineer Oct 2021 – Present
Tata Consultancy Services (TCS) *Pune, Maharashtra*

- Engineered and maintained enterprise-scale IT infrastructure with >99.9% uptime, enabling high availability and rapid issue resolution.
- Built end-to-end ML pipelines using Python, pandas, and scikit-learn to automate root cause analysis; reduced incident resolution time by 30%.
- Developed the NAMS Dashboard Tool in Python for real-time network diagnostics, cutting troubleshooting time by 30% and saving 10+ hours/week.
- Automated 20+ business-as-usual (BAU) tasks via Python scripting (log parsing, health checks, reporting), saving 60+ hours/month and increasing team productivity by 25%.
- Integrated proactive monitoring and alerting systems using Python and Bash, reducing issue detection latency and improving operational stability.
- Collaborated with DevOps and QA teams in Agile/Scrum environment to streamline CI/CD workflows using Git and Jenkins; reduced release cycle time by 25%.

Associate Product Engineer Jan 2021 – Sep 2021
Abroad Shiksha *Gurugram, Haryana*

- Developed internal dashboards using Python, Flask, and Plotly to track application health metrics, reducing downtime by 25%.
- Designed and deployed a customer support chatbot using IBM Watson and Python, reducing support tickets by 40% and improving CSAT scores.
- Automated operational workflows with Python, saving 35+ hours/month in manual effort and improving response time by 50%.
- Boosted chatbot NLP accuracy by 20% through improved data preprocessing, entity extraction, and intent classification tuning.
- Maintained Linux servers, monitored logs, and debugged SQL queries to ensure seamless backend performance and uptime.

PROJECTS

Interactive Data Dashboard (Python, Streamlit, Plotly)

May 2025

Built and deployed a full-stack dashboard to visualize and analyze CSV datasets interactively.

- Enabled dynamic charting (histogram, pie, scatter) with user-defined filters and layouts.
- Added backend logic for auto-type detection and pattern extraction; deployed with logging and error handling.

AI Chatbot for Support Automation (IBM Watson, Flask)

Jul 2021

Created a domain-specific NLP chatbot to automate FAQs and support.

- Reduced ticket volume by 40% and improved intent accuracy by 20% using feedback-based retraining.
- Integrated UI and backend pipeline for real-time user interactions and continuous learning.

AI-Based Resume Screening Tool (spaCy, Flask, TF-IDF)

Dec 2020

Designed an ATS-like platform for automated resume parsing and ranking.

- Compared resumes with job descriptions using cosine similarity and TF-IDF-based scoring.
- Delivered as a Flask web app enabling HR to upload, analyze, and shortlist candidates efficiently.

Sales Forecasting System (ARIMA, Prophet, LSTM)

Nov 2020

Engineered time series forecasting models to predict future sales.

- Built pipelines for seasonal decomposition, hyperparameter tuning, and result visualization.
- Automated retraining and insights delivery for decision-making teams.

CERTIFICATIONS

AWS Certified Solutions Architect – Associate

Aug 2024

Emphasis on scalable AI deployments using AWS cloud-native tools like SageMaker and Lambda.

AI4CPS – Certificate Programme in AI for Cyber-Physical Systems

Feb 2025

Specialized in integrating AI into embedded and real-time systems to improve performance, security, and resilience.

Post Graduate Diploma in Artificial Intelligence & Machine Learning, CDAC ACTS, Pune

GPA: 6.8

Intensive hands-on curriculum in ML, DL, NLP, and CV using Python, TensorFlow, and PyTorch.

ACHIEVEMENTS

Special Initiative Award — Tata Consultancy Services

May 2025

Honored as a role model for driving high-impact automation initiatives and cross-functional innovation.

Best Team Award — TCS Awards for Excellence

Recognized for outstanding collaboration and successful delivery of critical tech projects.

Applause Award — TCS Beyond Performance

Awarded for exceeding expectations through innovation and consistent high performance.

Service & Commitment Award — TCS

Recognized for long-term dedication, leadership, and service excellence across projects.

Feedback Maestro Award — TCS Beyond Performance

Acknowledged for providing actionable technical feedback and mentoring peers effectively.

PUBLIC SPEAKING

CDAC Acts, Pune (2025)

March 2025

Delivered a technical session on “Practical Python for AI/ML” to PG-DAI students, covering key Python concepts, debugging, and interview preparation.

Mock Interview Conductor – PG-DAI Batch, CDAC

February 2025

Conducted multiple mock interviews focusing on Python, data structures, and machine learning to prepare students for real-world technical interviews.
